

Math Activities #1

Here are some math activities you can practice at home, along with the nightly skill page, to help your child keep their math skills sharp. These are some skills we are working on in class now and or will in the future. These activities do not need to be turned in to me. Your child can tell you orally, write on a whiteboard, type on a computer or write out. I will send another Math Activities out next quarter with some updated activities. Enjoy!!

1. skip count by 2s, 3s, 5s, 10
2. write numbers to 120
3. practice writing calendar words
4. practice months and days of week
5. write addition facts through 12s
6. write subtraction facts through 12s
7. practice math facts on Fact Monster link
8. create graphs of people in family, shoes, canned food, etc
9. create patterns with objects
10. create story problems with numbers up to 20
11. practice math skills on Study Ladder link
12. create pictographs of clothes in closet
13. practice math skills on Splash Math link
14. practice creating shapes on Geoboard link
15. math challenge link
